BITCHCRAFT FAIR LOAD-IN & OUT

SET-UP IS 8 AM TO NOON
LOAD-OUT IS 6 PM T 9 PM

The Baird Center loading dock is located at:
850 N. 6th Street, Milwaukee, WI 53203
Open the Baird Center Loading Dock in Google Maps
Baird Center's standard exhibitor guidance directs vehicles to enter the loading dock via the North Helix and exit via the South Helix. Please follow posted signage and venue staff instructions.
Expect to unload your vehicle in 15 minutes or less, place your items at your booth, and then find permanent parking before re-entering the building to finish setting up.
Prefer to Park First? You may also load in through the front entrance and use the elevators to transport your inventory to Hall A if you prefer to park your vehicle first. This is a good option for vendors with smaller setups or those who would rather unload from their parked vehicle. Please allow extra time for transporting your items through the building and up to the expo hall.

If you need to use the loading dock to remove your inventory, your booth must be completely packed before you enter the loading dock area. Specifically, do not pack up your booth while loading your vehicle at the dock. This creates bottlenecks and prevents other vendors from accessing the loading area. The dock is for efficient loading and immediate vehicle departure only.
Alternatively, you may transport your packed inventory through the front entrance and use the elevators to reach your parked vehicle.
The loading dock closes at 9:00 PM. All vendors using the dock must complete their departure before that time.
Thank you for helping us keep load-in and load-out organized, safe, and efficient for everyone!
